CMMS CS-201

DC 12V Access Control System Power Supply

Overview

CMMS CS-201 access control power supply has been developed specifically to support access controls and electric locking hardware. The high performance, heavy-duty circuitry design is ideal for the inductive loads generated by access control hardware for high performance and longevity. The modular design is built around several different control modules to meet your specific needs for virtually any electric lock system.

Features

- Designed for Failsafe & Fail secure Applications
- Include Emergency Release Input – Failsafe Emergency Release is a Standard Feature on CS-201
- Adjustable Relay Timer to Control Unlock Time between 1 to 10 Seconds
- DC 12V Power Supply is Suitable for Access Control System, Electric Locks & ELV Equipments

Specifications

Model	CMMS CS-201
Power Input	AC 180V - 250V 50Hz
Power Output	DC12V 3A
Dimensions	185 (L) mm × 77 (W) mm × 63 (H) mm
Net Weight	1.48kg
Operating Temperature	-20℃ - 55℃
Operating Humidity	30% - 90%

Applications

CMMS CS-201 power supply is suitable for building intercom, all kinds of access controllers, especially suitable for all kinds of electric locks.
