CMMS
Security made simple

- White panel with a slim narrow border and rounded design, providing a comfortable touch.
- Made of PC flame-retardant material, corrosion-resistant, heat-resistant, impact-resistant, and not easy to change color.

The waterproof emergency stop button is a safety controller used to quickly stop the operation of equipment in an emergency. This product is made of high-quality waterproof materials and can maintain a stable working state even in harsh environments, effectively preventing the intrusion of water, oil, and other substances. Used in conjunction with other safety controllers, it can enhance the safety and reliability of equipment.

Product Specification

Product Model	CMMS-B1
Color	White
Product Material	PC flame-retardant material
Rated Voltage	12V
Installation Size	60mm
Product Size (Length x Width)	86mm x 86mm
