CMMS
Security made simple

- Surface Mount
- One Open & One Closed
- Modular Structure, Easy to Assemble and Aisassemble

The CMMS-ZB2 emergency stop push button is a device used to immediately stop the operation of equipment in emergency situations. Pressing the emergency stop button can immediately cut off the power or mechanical transmission system of the equipment to ensure the safety of personnel and equipment. The emergency stop button is usually installed in an easily accessible location of the equipment, such as on the control panel, operation table, or visible position of the equipment.
