CMMS
Security made simple

- Purpose-built for door release
- Made of stainless steel material, ensuring durability against wear and scratches
- Suitable for both indoor and outdoor installation
- Insulated design to prevent electric shock hazards

CMMS-PBK-811B stainless steel door release button is a high-quality product that provides secure and reliable access control. Its purpose-built design for door release, stainless steel material, and insulation for electrical safety make it an ideal choice for use in various access control systems. Additionally, its durable construction ensures a longer lifespan.

Product Specification

Model	CMMS-PBK-811B
Standard Structure	Stainless steel panel, metal button
Electrical Performance	Maximum durable current 3A@36VDC
Contact Output	NO/NC/COM contacts
Applicable Type	Hollow Door
Applicable Temperature	-10~+55℃ (14-131F)
Applicable Humidity	0~95% relative humidity
Product Weight	0.15kg
Product Size (Length*Width*Height)	88mm* 88mm* 21.7mm
