

XC-9000USB

USB Dongle

The XC-9000 USB dongle is the authorization carrier for the XC-9000 series broadcasting management platform. By connecting to the server via a USB interface, it enables license authentication and unlocks system functionalities.

MAIN FEATURES

▲ System Architecture & Capacity

- Based on B/S (Browser/Server) architecture
- Supports up to 1000 IP endpoint devices
- Available for installation on Microsoft Windows 10/11

▲ User & Permission Management
